

I have some concerns about expansion of LPFM stations that may take priority over current FM translators that help broadcast national or regional services, such as Air 1. If my local reception of Air 1 were to be discontinued, I would consider it a great disservice. It is the only Christian music formatted station that I can clearly receive in my area. It is a refreshing and wholesome alternative to the secular stations, many of which are offensive to my values. I know that many other people in my community would feel likewise disappointed if Air 1 could not be heard here. In addition to the uplifting music of Air 1, they inform the listeners of local and regional events we may never hear of otherwise. I am a financial supporter of Air 1 because I believe in the work that they do. The FCC should protect family-friendly, positive broadcasting such as Air 1. Thank you very much.
